We invite all researchers, lecturers, doctoral students, post-graduate students, translators and interested parties to participate in the International Scientific Symposium on the theme: "**DOSTOYEVSKY AND HIS GENIUS**", which will be organized on June 6, 2023.

This symposium is held in honor of the bicentenary of the birth of the great Russian writer FM Dostoyevsky, whose work has come complete in the Albanian language, as well as taking into account the writer's extraordinary contribution to Russian and world literature, and the appreciation of UNESCO, as one of the most quoted and translated Russian authors in the world, whose legacy is studied in schools, universities, as well as by scientists of various profiles. This international scientific symposium is dedicated to the perception of the work of the great writer in world culture. The importance of this event is appreciated due to the fact that the work of the great writer reflects not only the past of humanity, but also its future. Therefore, by studying Dostoevsky today, one can understand the prospects for the development of humanity in the future. In this symposium, a wider participation of researchers both inside the country and outside it is considered, considering Dostoevsky as a complexity in the linguistic, literary, philosophical, cultural and not only. The translations of his work in different languages and the finding of his complete work in the Albanian language make possible interesting studies in the field of translation.

Subtopics of the conference:

- **The legacy of FM Dostoevsky in world and Russian culture and history;**
- **Dostoevsky in religious and philosophical thought;**
- **Dostoevsky's influence on Russian modernism;**
